- OSHA Regulated: Not regulated

**Signs and Symptoms of Exposure:**
- Eye Contact: a stinging sensation, excess blinkuine and tear production, redness and swelling of the conjunctive. Skin contact: redness and a burning sensation. Prolonged or repeated contact may result in the absorption of potentially harmful amounts of material, with identical symptoms as ingestion. Ingestion: nausea, headache, dizziness and abdominal pain. Inhalation: headache, nausea, coughing, chest pain and vomiting.

**Medical Conditions Generally Aggravated by Exposure**
- None established

**Emergency and First Aid Procedures**
- Inhalation: remove victim to fresh air and provide oxygen if breathing is difficult.
- Eyes: flush exposed areas with large quantities of water for at least 15 minutes. Skin: immediately flush skin with large quantities of water for at least 15 minutes while removing clothing. If irritation is evident or discoloration persists, seek medical attention. Ingestion: do not induce vomiting unless directed by medical personnel. Drink large quantities of water. Call Physician.

Section VII - Precautions for Safe Handling and Use

**Steps to Be Taken in Case Material is Released or Spilled:**
- Remove any ignition source.

**Waste Disposal Method**
- Dispose of in accordance with all Local, State and Federal regulations.

**Precautions to Be Taken in Handling and Storing**
- Store at room temperatures between 40°F-110°F, keep container tightly closed. Do not mix with strong oxidizers, acids or alkalies.

**Other Precautions**
- Do not reuse empty containers for other liquids.

Section VIII - Control Measures

**Respiratory Protection (Specify Type)**
- Use NIOSH approved chemical cartridge (organic vapor) respiratory equipment when spraying material (full face respirator is recommended).

**Ventilation**
- Local Exhaust: Sufficient to maintain air concentration as required by OSHA
- Mechanical (General): Maintain adequate ventilation
